TAPS

Taps are made in three types: 1st or taper for starting the thread, 2nd for completing the thread through a plate and the 3rd or bottoming for blind holes. Taps should generally be lubricated with light oil for brass and soluble oil for steel.

Taps go through holes slightly smaller than the tool, so as to cut a thread. This is the 'tapping drill'. The 'clearance drill' is the hole the screw will pass through without touching the thread.

Clearance Table

2BA	4.80mm
3BA	4.20mm
4BA	3.70mm
5BA	3.30mm

AUTOMATED SALES FREEPHONE

Most UK orders are sent postage free and despatched the same day if placed on our interactive order line.

0800 328 9435

Please call our sales office on 01273 421321 if you don't know your customer number and pin.

*Call before 3pm on weekdays for same day despatch. **Free postage only applies to UK orders, and not to heavy or bulky items such as books, fluids, domes etc. or very low value orders. Cannot be used in addition to other special discounts.

10. Clockmaker's supplies

CLOCK KEY SIZES

There are two key numbering systems: English and European. As a result, you can't order a key by quoting the number on an old one unless you know which system that number refers to! Our keys are made to the metric size shown alongside each key. The table to the right shows the two sizes a numbered key could be. We have shown the English sizes in their nearest metric equivalent.

Key No.	English	European	Key No.	English	European
000	2.00	1.75	10	4.40	4.75
00	2.20	2.00	11	4.60	5.00
0	2.40	2.25	12	4.80	5.25
1	2.60	2.50	13	5.00	5.50
2	2.80	2.75	14	5.20	5.75
3	3.00	3.00	15	5.40	6.00
4	3.20	3.25	16	5.60	6.25
5	3.40	3.50	17	5.80	6.50
6	3.60	3.75	18	6.00	6.75
7	3.80	4.00	19	6.20	7.00
8	4.00	4.25	20	6.40	7.25
9	4.20	4.50			

WATCH & BROCOT KEYS

Plated key with brass handle. There are two numbering systems. One system uses size 12 as the largest, and the other uses the reverse. It is important to order by size and not by number.

MARBLACK SLATE BLACKING 125ML

[Illustrated instructions](#) can be viewed online at www.marblack.com.

Price per unit in £ on 13/06/2014

MARBLACK SLATE BLACKING 125ml

Black Slate Clocks are becoming more and more valuable every year, with increasing importance being attached to the condition of the slate case. There is no magic chemical formula for restoring a black mirror finish to dulled and greying slate (actually limestone). The correct method involves completely dismantling the case and repolishing each individual section with sophisticated polishing machinery. Dismantling can do more harm than good because the cases were often wired and cemented together very firmly, and re-polishing requires special skills.

To overcome this problem we introduced 'Meadows & Passmore's Slate Blacking', a jet-black emulsified stain that enriches and blackens the surface in preparation for polishing with a good beeswax polish. It is not like black paint and cannot completely mask grey areas of oxidised limestone, but does considerably enhance the appearance of the case without making it look too 'done up'.

Slate Blacking is simple to apply. Full instructions are supplied and because of its concentration, a little goes a long way.

GARRYFLEX BLOCKS

Available in fine, Medium and Coarse.

Flexible blocks made of resilient rubber filled with hard abrasive grit. The grit is not just on the surface but evenly distributed throughout so that a constant finish is imparted throughout its life, unlike abrasive papers that become finer in use. 80 x 50 x 20mm.

COLD CASTING

Sometimes a small cast brass part needs to be replaced but the cost of conventional casting in molten brass cannot be justified. A new method of making these items involves mixing extremely fine brass dust with a thin clear resin and catalyst. The brass is not just filings, but a purpose made dust. The result can be cleaned with wire wool, polished with brass polish etc. to give an authentic appearance. You can cut, file & drill it but you cannot solder onto it. Items such as hinges must be cast in position. Moulds can be made from liquid latex, so you can simply make a copy of an existing foot or spandrel to make another.
