### TAPS

Taps are made in three types: 1st or taper for starting the thread, 2nd for completing the thread through a plate and the 3rd or bottoming for blind holes. Taps should generally be lubricated with light oil for brass and soluble oil for steel.

Taps go through holes slightly smaller than the tool, so as to cut a thread. This is the 'tapping drill'. The 'clearance drill' is the hole the screw will pass through without touching the thread.

### CLOCK KEY SIZES

There are two key numbering systems: English and European. As a result, you can't order a key by quoting the number on an old one unless you know which system that number refers to! Our keys are made to the metric size shown alongside each key. The table to the right shows the two sizes a numbered key could be. We have shown the English sizes in their nearest metric equivalent.

Key No.	English	European	Key No.	English	European
000	2.00	1.75	10	4.40	4.75
00	2.20	2.00	11	4.60	5.00
0	2.40	2.25	12	4.80	5.25
1	2.60	2.50	13	5.00	5.50
2	2.80	2.75	14	5.20	5.75
3	3.00	3.00	15	5.40	6.00
4	3.20	3.25	16	5.60	6.25
5	3.40	3.50	17	5.80	6.50
6	3.60	3.75	18	6.00	6.75
7	3.80	4.00	19	6.20	7.00
8	4.00	4.25	20	6.40	7.25
9	4.20	4.50			

### WATCH & BROCAT KEYS

	<b>MARBLACK SLATE BLACKING 125ml</b>	0216 012515	1+		£6.74
	<p>Black Slate Clocks are becoming more and more valuable every year, with increasing importance being attached to the condition of the slate case. There is no magic chemical formula for restoring a black mirror finish to dulled and greying slate (actually limestone). The correct method involves completely dismantling the case and repolishing each individual section with sophisticated polishing machinery. Dismantling can do more harm than good because the cases were often wired and cemented together very firmly, and re-polishing requires special skills.</p> <p>To overcome this problem we introduced 'Meadows &amp; Passmore's Slate Blacking', a jet-black emulsified stain that enriches and blackens the surface in preparation for polishing with a good beeswax polish. It is not like black paint and cannot completely mask grey areas of oxidised limestone, but does considerably enhance the appearance of the case without making it look too 'done up'.</p> <p>Slate Blacking is simple to apply. Full instructions are supplied and because of its concentration, a little goes a long way.</p>		2+		£6.07
