

## 5. Dials

Supadial transfers. Card & metal dials. Glass-fibre and enamel dials etc.

### SUPADIAL TRANSFERS

SupaDial Transfers can be applied to almost any clean flat surface that can withstand being moistened. The numerals and minute divisions are pre-positioned. The time taken to apply a transfer is normally only a couple of minutes compared to laborious hand painting. Each transfer comes with full instructions. The size given is the diameter of the time track. SupaDial transfers cannot be applied to card and will not adhere to acrylic lacquers and some plastics. Our SupaDial transfers make your dials look re-painted at a fraction of the cost. Just soak in water, slide the image onto a clean flat surface and position. Remove any trapped air bubbles and allow to dry. When fully dry (and not a moment before) peel off the backing leaving only the solid image behind - just as if you'd done it with a brush!

### SUPADIAL TRANSFERS STYLE TN

---	---	-------------	----	--------

## 5. Dials

### CARD DIALS

All card (not metal) dial sizes shown are diameters of printing. There is at least 1/2" of plain card around each dial, unless shown otherwise. As a guide, you can work out the approximate numeral height by dividing the diameter of printing by the following numbers. N = 7.6, AN = 8, R = 6.35, RL = 6, RS = 8. Thus the numeral height of a 6" N is 6/7.6 = 0.79" You can use the same formula for SupaDial Transfers, but remember it is only a guide and is based on the figure 12 or XII.

### CARD DIAL STYLE N

Bold Arabic numerals. Semi-gloss is a matt white. Gloss is a gloss white which looks like enamel when behind glass. Antique is a matt off-white that looks a little aged.

Price per unit in £ on 19/02/2018

## 5. Dials

### PUBLIC CLOCK DIALS

Glass-fibre dials for exterior clocks made from gel-coated rigid GRP, Convex, with a re-enforcing ring around the perimeter. The numerals are very slightly raised on the surface ready to gild. The following sizes and colours are normally available from stock. Various colours are available to special order. Dials can be supplied with Arabic numbers or to any other customer specification, but this usually incurs additional mould costs. We can also supply dials for rear illumination. Using these dials with our movements, hands, weathervanes and other sundries spectacular public clocks can be created.

Nominal Size	Outside diameter	Actual face diameter	Numeral height	Nominal Size	Outside diameter	Actual face diameter	Numeral height
1'	330mm	270mm	40mm	4'	1210mm	1075mm	165mm
1'6"	480mm	395mm	65mm	5'	1500mm	1340mm	205mm
2'	595mm	510mm	85mm				
2'6"	820mm	750mm	100mm				
3'	945mm	815mm	130mm

### DIAL RESTORATION

For many types of clock, such as bracket, longcase etc. it is both wrong and impractical to replace the dial just because it looks a little tatty.

We offer a dial restoration service for these situations, and can either touch up the original or strip the dial back to the bare surface and start again. We can do this on almost any surface, including candle clock globes. These can be blown to order if needed.

Because the condition of a dial has so much bearing on the restoration and repainting cost, we can't give a price without seeing the job. We can sometimes give a rough figure by phone if the work can easily be described, but dial painting is a very labour intensive and the work is very skilled. A digital photo emailed to us is the best way to obtain a quote. We need to see any dial that has colour work on it before we can give a definite price.
