

## 7. Bezels & Glass

Bezels & Glass. Rough edged round and square glass. Round and oval domes with bases.

### BRASS BEZEL FOR AMERICAN CLOCKS

The size is the outside diameter. Because the brass is thin, the internal size is fractionally less. Complete with flat glass fitted.

Price per unit in £ on 27/01/2019

	BRASS BEZEL FOR AMERICAN CLOCKS 13 1/8" KIT	0368 131815	1+	£43.24

### SPUN BRASS OFFICE DIAL BEZELS.

Item comes with an aluminium site ring. This ring can only be used when fitting flat glass. The ring must be removed and glazing plaster (0703 000115) used instead when fitting convex.

Very high quality bezels, spun from solid brass. Supplied with hinge, tab soldered in place. Unglazed. Although the bezel is made from solid brass, the reflector ring is aluminium. Sizes are nominal, to suit dials of the size shown. If convex glass is to be fitted, the ring should be discarded and glazing plaster used instead.

Price per unit in £ on 27/01/2019

	OFFICE DIAL BEZEL, Antique style, 8inch Spun brass bezel with solid brass sight ring. Aged appearance. 8 1/2" (215mm) o/d. Weight 145g. Hinge and tab fitted. Polished brass. Inside diameter of sight ring 185mm. Glass to suit approx: 7 7/16" convex 0545 070715.	1468 000815	1+	N/A

### ROUND CLOCK GLASSES ROUGH-EDGE CONVEX

We stock an enormous range of convex glasses for clocks, barometers, instruments etc. We can also make them to your requirements, even in small quantities. As glass sizes vary in production, the size given is the nearest 1/16" upto 12". For 12" and above, the size given is accurate to within 1/8".

Because we have to cut the circle before it is bent, we cannot produce them to an accurate size without grinding them down afterwards. You can make small adjustments with emery paper. All round convex glasses are made from 2mm glass up to 15" when 3mm is used. The price of large glass varies tremendously due to supply and demand. It is very costly for us to make small quantities. If you need a glass not shown, please enquire.

### GLASS DOMES - ROUND

Most of these domes are hand-blown so slight variations in the size and shape will occur. There is also the possibility of small imperfections and bubbles in the glass, as found on many antique domes. The process of manufacture has hardly changed in 100 years. Please enquire for any size of dome not shown in this list. Glass is excluded by carriers for insurance purposes, so domes are now generally sent at your risk. Small round domes are fairly robust, but large domes are better collected by arrangement. Domes cannot be made to order in other widths because of the enormous cost of the tool needed. Please note that a minute logo may appear on the base of some domes. The diameter given is the outside. The glass thickness varies from 1-2mm.

### HAND-MADE DISPLAY CASES

These beautifully made display cases are the perfect answer when a dome is not available. Delicate mahogany beading and clear glass combine to make a perfect dust-free display. They are made to order, and can be almost any size. Toughened glass is used for large exhibition cases. Please contact us with the internal height, width and depth of the case you want and we will quote you the price and approximate delivery time.
